

# MicroFireX<sup>®</sup>

The Tiny Fire Extinguisher of  
the Future  
with Nano Technology

0.3m<sup>3</sup>

Stops fire at its source – protecting you and your loved ones. Unmatched with its durable metal body, compact size, and protection capacity.

CE

IT Panels, Server rack cabinets

Marine vessel engine and electrical cabinets

Solar battery packs and vehicle electrical distribution panels

EV and Charging stations

Electrical cabinets, cable ducts, and meter boxes

Lithium or other battery packs

What is  
MicroFireX?

MicroFireX is an automatic fire suppression device powered by nanotechnology.

Activates when its thermal cord reaches 170°C, extinguishing fires in 5 seconds.

Durable metal body weighing 50 grams, provides 0.3 m<sup>3</sup> protection volume. No electrical connection required, easily mounted with adhesive tape.

S-type aerosol technology leaves no residue – safe for electronics and the environment.

Why  
MicroFireX?

✓ EU Certified Safety : Module B + Module C approved. Design and production quality tested by independent bodies, compliant with 2013/29/EU.

✓ Residue-Free and Fast : Extinguishes within 5 seconds of detection, leaves no residue like water or foam. Safe for electronic devices.

✓ Easy and Maintenance-Free : Installed with adhesive tape, no electrical connection needed. Maintenance-free for 6-year shelf life.
